Introduction

About PIMCO Funds: Global Investors Series plc (GIS funds)

Institutional clients can invest in PIMCO solutions via privately managed separate accounts or our pooled mutual fund complexes, while retail investors can participate in many of the same investment strategies through our pooled mutual fund complexes. These options include the PIMCO Funds: Global Investors Series plc which provide:

- **Broad diversification and risk management** – By investing in our GIS funds, our clients gain exposure to a broad range of specialist investment solutions — diversified across asset classes, sectors and geographies — all of which benefit from PIMCO’s focus on managing risk and delivering returns for our clients. That diversification benefit is particularly important for investors with smaller amounts who otherwise might not be able to diversify so broadly in a segregated account solution.
- **Transparent pricing and liquidity** – Impartial third parties price all fund investments objectively and consistently. With daily dealing and valuation processes that are accessible and transparent, our clients can better manage their cash flow and asset-allocation decisions.
- **Simplified administration and oversight** – Investing in a GIS fund reduces the time and effort spent monitoring a separately managed portfolio, such as having only one net asset value per holding. Net asset values are available at www.pimco.com
- **Strict regulatory oversight** – Our GIS funds, domiciled in Dublin, must comply with UCITS law (Undertakings for Collective Investment in Transferable Securities) and such compliance is subject to strict Irish regulatory oversight.
- **Investments in PIMCO Funds** – Global Investors Series plc are made subject to the terms of the offering documentation. This Shareholder Guide is provided for informational purposes only and is subject to change without notice from time to time.

Thank you for taking the time to learn more about PIMCO and the GIS fund complex. We look forward to assisting you with all your investment requirements. Please contact us on one of the following numbers, if you have any questions or need further information:

Currency Hedging Options

If the base currency of the fund is not a suitable option for you, please contact your PIMCO representative for more details on alternative currency classes.

- **Hedged share classes** – designed to hedge against movements and exchange rate fluctuations between the currency denominations of the Hedged Classes and the currency exposures of the Fund.

- **Partially hedged share classes** – designed to primarily hedge only the developed currency exposures of the assets in the underlying portfolio back to the currency denomination of the Partially Hedged Class while leaving emerging markets currency exposures unhedged
- **Currency Exposure classes** – designed to seek to capture exchange rate fluctuations between the denominated currency of the relevant Class and the currencies of the Fund's assets and thus shall effectively give unhedged exposure.
