¹Please see updated information on Max Rates that is posted at Pimco.com/closedendfunds. In any event, the Max Rate will not be lower than 0%.

²150% if all or part of the dividend consists of taxable income or capital gain.

³"Taxable Equivalent of the Short-Term Municipal Obligation Rate" means 90% of the quotient of (A) the per annum rate expressed on an interest equivalent basis equal to the S&P 7 Day Index divided by (B) 1.00 minus the Marginal Tax Rate (expressed as a decimal).

⁴The applicable % for PCN, PFL, and PFN are effective May 3, 2021.

⁵LIBOR Replacement rate means prior business day SOFR rate plus the spread adjustment of 0.03839%.

⁶For the avoidance of doubt, the Max Rate for PFL and PFN may be less than the Applicable %, but will not be lower than 0%.

Past performance is no guarantee of future results. Investing in securities entails risk, including possible loss of principal. The use of leverage may cause a Fund to liquidate portfolio positions when it may not be advantageous to do so to satisfy its obligations or to meet segregation requirements. The use of leverage may cause a Fund to be more volatile, which may increase the risk of investment loss. Leverage, including borrowing, may cause a Fund to be more volatile than if the Fund had not been leveraged. Derivatives may involve certain costs and risks such as liquidity, interest rate, market, credit, management and the risk that a position could not be closed when most advantageous. Investing in derivatives could lose more than the amount invested.

Closed-end funds, unlike open-end funds, are not continuously offered. After the initial public offering, shares are sold on the open market through a stock exchange. Closed-end funds may be leveraged and carry various risks depending upon the underlying assets owned by a fund. Investment policies, management fees and other matters of interest to prospective investors may be found in each closed-end fund annual and semi-annual report.
