

Fund information

Fund inception date	30 March 2007	
Strategy	Income	
Total Net Assets (in millions)	\$128,690.4	
Portfolio manager(s)	Dan Ivascyn Alfred Murata Joshua Anderson	
Effective duration (yrs)	1.96	
Benchmark duration (yrs)	6.23	
Effective maturity (yrs)	4.00	
Class	CUSIP	Ticker
Institutional	72201F490	PIMIX

Expenses

Gross Expense Ratio (%)	1.09
Adjusted Expense Ratio (%)	0.50

The Adjusted Expense Ratio excludes certain investment expenses, such as interest expense from borrowings and repurchase agreements and dividend expense from investments on short sales, incurred directly by the Fund or indirectly through the Fund's investments in underlying PIMCO Funds (if applicable), none of which are paid to PIMCO.

REFINITIV LIPPER FUND AWARDS
2020 WINNER
UNITED STATES

The Lipper Fund Awards recognized the PIMCO Income Fund, Institutional for the 10 year performance period out of 37 funds under the Multi-Sector Income Funds Classification.

Performance summary

The PIMCO Income Fund returned 2.65% after fees in November, and year-to-date the Fund has returned 4.23% after fees.

The Income Fund continued to provide investors with monthly distributions through November.

The higher yielding portion of the portfolio contributed as corporate credit positions performed strongly over the month. The higher quality portion of the portfolio was also positive in November as U.S. duration contributed to performance.

Contributors

- Holdings of corporate credit as spreads tightened
- Exposure to emerging market debt and currencies
- Exposure to U.S. duration as rates fell modestly
- Holdings of securitized credit, primarily Non-agency and agency MBS

Detractors

- Short exposure to Japanese duration

Performance quoted represents past performance. Past performance is not a guarantee or a reliable indicator of future results. Investment return and the principal value of an investment will fluctuate. Shares may be worth more or less than original cost when redeemed. Current performance may be lower or higher than performance shown. For performance current to the most recent month-end, visit PIMCO.com or by calling 888.87.PIMCO.

Differences in the Fund's performance versus the Bloomberg Barclays U.S. Aggregate Index (the "Index") and related attribution information with respect to particular categories of securities or individual positions may be attributable, in part, to differences in the pricing methodologies used by the Fund and the Index. There is no assurance that any fund, including any fund that has experienced **high or unusual performance** for one or more periods, will experience similar levels of performance in the future. High performance is defined as a significant increase in either 1) a fund's total return in excess of that of the fund's benchmark between reporting periods or 2) a fund's total return in excess of the fund's historical returns between reporting periods. Unusual performance is defined as a significant change in a fund's performance as compared to one or more previous reporting periods.

The minimum initial investment for institutional class shares is \$1 million; however, it may be modified for certain financial intermediaries who submit trades on behalf of eligible investors.

Please note that this material contains the opinions of the manager as of the date noted, and may not have been updated to reflect real time market developments. All opinions are subject to change without notice.

Portfolio characteristics as of 30 November 2020

	% Market Value	Duration (years)
Government-Related	-35.6	-1.70
U.S. Treasury ¹	-3.2	0.67
U.S. Agency ²	0.0	0.00
Swaps and Liquid Rates ³	-32.4	-2.37
Securitized ⁴	77.9	2.62
Agency MBS	36.4	1.12
Non-Agency MBS	32.9	1.40
CMBS	5.0	0.03
Asset Backed Securities	3.1	0.05
Other	0.5	0.02
Investment Grade Credit	14.4	0.92
High Yield Credit	9.4	0.11
Non-U.S. Developed	2.5	-0.60
Emerging Markets	15.6	0.50
Bonds and Other Long Duration Instruments	11.8	0.48
Short Duration Instruments ⁵	3.8	0.02
Other	4.1	0.23
Net Other Short Duration Instruments ⁶	11.7	-0.12

Portfolio structure is subject to change without notice and may not be representative of current or future allocations.

MV% may not equal 100 due to rounding.

¹ Includes U.S. Treasury notes, bonds, futures, and inflation-protected securities

² Includes U.S. agencies, FDIC-guaranteed and government-guaranteed corporate securities, and supranationals

³ Includes U.S. dollar denominated interest rate swaps, swaptions, options, and other rate related derivatives. Other portfolio derivatives, where applicable, may be included as part of other sectors based upon their underlying risk characteristics.

⁴ The Securitized bucket will include Agency MBS, non-Agency MBS, CMBS, ABS, CDO, CLO, and Pooled Funds.

⁵ Short Duration Instruments includes an emerging market security or other instrument economically tied to an emerging market country by country of risk with an effective duration less than one year and rated investment grade or higher or if unrated, determined to be similar quality by PIMCO. Includes the value of short duration emerging markets instruments previously reported in "Cash Equivalents".

⁶ Net Other Short Duration Instruments includes securities and other instruments (except those instruments tied to emerging markets by country of risk) with an effective duration less than one year and rated investment grade or higher or, if unrated, determined by PIMCO to be of comparable quality, commingled liquidity funds, uninvested cash, interest receivables, net unsettled trades, broker money, short duration derivatives and derivatives offsets. With respect to certain categories of short duration securities, the Adviser reserves the discretion to require a minimum credit rating higher than investment grade for inclusion in this category. Derivatives Offsets includes offsets associated with investments in futures, swaps and other derivatives. Such offsets may be taken at the notional value of the derivative position.

Portfolio positioning

The Fund is divided into two general segments: higher yielding assets that are expected to benefit when economic growth is robust and higher quality assets expected to benefit if economic growth is weak.

Within the higher quality segment, we remain cautious overall as real rates in many markets are close to zero or negative. Our U.S. duration exposure has maintained constant over the past few months, where rates remain higher relative to other developed countries. To balance these positions, we look to hedge some of our duration exposure with a short position in Japan where real yields are already negative.

The higher yielding segment is weighted toward senior positions in the capital structure. We seek to be diversified across credit exposures within corporate, securitized, and emerging market debt. We've added to investment grade corporate positions since March

as issuance levels have been high and new issue markets have offered value to lenders. We remain cautious in allocation to high yield corporates and are mindful of liquidity. We continue to look for opportunities to add senior securitized credit exposure, particularly in non-Agency U.S. and UK mortgages, which feature strong "bend but don't break" resilience and attractive loss-adjusted yields through a range of downside economic scenarios.

Month in review

Risk assets broadly gained in November as positive vaccine developments and the US election outcomes - a Biden victory alongside a potentially divided congress - bolstered market optimism. Global equities rallied with the S&P 500 hitting record highs, credit spreads tightened, the dollar weakened, and oil prices rose. Developed sovereign yields were broadly mixed - U.S. yields fell and the curve flattened, while yields in the U.K. and Germany ended the month higher.

Against this backdrop, performance was positive over the month, continuing to further year-to-date returns into positive territory after Q1's volatility. The Fund's corporate credit positions were the largest contributor; holdings of investment grade and high yield corporate credit contributed as spreads tightened, spurred by the possibility that a COVID-19 vaccine could be deployed early next year. Exposure to emerging market debt and currencies were both positive contributors for the month. The fund's holdings of securitized credit in agency MBS and non-Agency MBS also contributed to performance as home price fundamentals remained solid.

Interest rate strategies were also a positive contributor overall during the month. Exposure to U.S. duration contributed while short exposure to Japanese duration modestly detracted from performance.

*Prior to 31 December 2014 these categories were reported separately. Portfolio allocations and other information in the charts are based on the fund's net assets. These percentages may differ from those used for the fund's compliance calculations, including the fund's prospectus, regulatory, and other investment limitations and policies, which may be based on total assets of the fund or other measurements, may include or exclude various categories of investments from those covered in the portfolio allocation categories shown in this report, and may be based on different classifications and measurements of the fund's investments and other criteria.

Outlook and strategy

The global economy has continued to recover slowly from the deepest recession in modern times, but the path of recovery will likely stay volatile as COVID-19 cases uptick again throughout the U.S. and parts of Europe. This recessionary environment is very different from past periods given the external shock of the global COVID-19 pandemic as well as the strong fiscal and monetary response from policymakers around the world. In the short-term the recovery will be impacted by two key swing factors: the state of the pandemic and the degree to which fiscal policy stays active or retreats. In the long-run we believe the COVID crisis will likely weigh on potential growth output and leave significant “economic scarring” on the economy. The COVID-19 pandemic has also amplified several long-term disruptors including China’s rise, populism, technology, and climate-related risks which we believe will create an even more challenging landscape for investors moving forward.

We expect the global economy to transition from intense near-term hurting during the virus-suppression phase to above-trend growth for a couple of years after the COVID recession. Our baseline continues to be a bumpy and uneven recovery with pre-crisis level of economic activity unlikely to be reached before 2022 in most Western economies.

Within the Income Strategy, we remain focused on diversification and staying senior in the capital structure. We remain focused on “bend but not break” exposures, where we may experience some price volatility but seek to avoid defaults.

Targets high, consistent income

Investors should consider the investment objectives, risks, charges and expenses of the funds carefully before investing. This and other information are contained in the fund’s prospectus and summary prospectus, if available, which may be obtained by contacting your financial advisor or PIMCO representative or by visiting www.pimco.com. Please read them carefully before you invest or send money.

Investments made by a Fund and the results achieved by a Fund are not expected to be the same as those made by any other PIMCO-advised Fund, including those with a similar name, investment objective or policies. A new or smaller Fund’s performance may not represent how the Fund is expected to or may perform in the long-term. New Funds have limited operating histories for investors to evaluate and new and smaller Funds may not attract sufficient assets to achieve investment and trading efficiencies. A Fund may be forced to sell a comparatively large portion of its portfolio to meet significant shareholder redemptions for cash, or hold a comparatively large portion of its portfolio in cash due to significant share purchases for cash, in each case when the Fund otherwise would not seek to do so, which may adversely affect performance.

A word about risk: Investing in **foreign denominated and/or domiciled securities** may involve heightened risk due to currency fluctuations, and economic and political risks, which may be enhanced in emerging markets. **Mortgage and asset-backed securities** may be sensitive to changes in interest rates, subject to early repayment risk, and their value may fluctuate in response to the market’s perception of issuer creditworthiness; while generally supported by some form of government or private guarantee there is no assurance that private guarantors will meet their obligations. **High-yield**, lower-rated, securities involve greater risk than higher-rated securities; portfolios that invest in them may be subject to greater levels of credit and liquidity risk than portfolios that do not. **Derivatives** may involve certain costs and risks such as liquidity, interest rate, market, credit, management and the risk that a position could not be closed when most advantageous. Investing in derivatives could lose more than the amount invested. The Fund is **non-diversified**, which means that it may concentrate its assets in a smaller number of issuers than a diversified fund. The value of most bond funds and fixed income securities are impacted by **changes in interest rates**. Bonds and bond funds with longer durations tend to be more sensitive and more volatile than securities with shorter durations; bond prices generally fall as interest rates rise. **Portfolio turnover** may indicate higher transactions costs and may result in higher taxes when fund shares are held in a taxable account.

It is important to note that differences exist between the fund’s daily internal accounting records, the fund’s financial statements prepared in accordance with U.S. GAAP, and recordkeeping practices under income tax regulations. It is possible that the fund may not issue a Section 19 Notice in situations where the fund’s financial statements prepared later and in accordance with U.S. GAAP or the final tax character of those distributions might later report that the sources of those distributions included capital gains and/or a return of capital. Please see the fund’s most recent shareholder report for more details.

Although the Fund may seek to maintain stable distributions, the Fund’s distribution rates may be affected by numerous factors, including but not limited to changes in realized and projected market returns, fluctuations in market interest rates, Fund performance, and other factors. There can be no assurance that a change in market conditions or other factors will not result in a change in the Fund’s distribution rate or that the rate will be sustainable in the future.

For instance, during periods of low or declining interest rates, the Fund’s distributable income and dividend levels may decline for many reasons. For example, the Fund may have to deploy uninvested assets (whether from purchases of Fund shares, proceeds from matured, traded or called debt obligations or other sources) in new, lower yielding instruments. Additionally, payments from certain instruments that may be held by the Fund (such as variable and floating rate securities) may be negatively impacted by declining interest rates, which may also lead to a decline in the Fund’s distributable income and dividend levels.

The Lipper Fund Awards are based on the Lipper Leader for Consistent Return rating, which is a risk-adjusted performance measure calculated over 36, 60 and 120 months. The fund with the highest Lipper Leader for Consistent Return (Effective Return) value in each eligible classification wins the Lipper Fund Award. For more information, see lipperfundawards.com. Morningstar Rating™ as of 30 November 2020 for the Institutional series; other classes may have different performance characteristics. The PIMCO Income Fund was rated against the following numbers of Multisector Bond funds over the following time periods: Overall 4 Stars (292 funds rated); 3 Yrs. 3 Stars (292 funds rated); 5 Yrs. 4 Stars (257 funds rated); 10 Yrs. 5 stars (131 funds rated). **Past performance is no guarantee of future results.** The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Duration is a measure of a portfolio's price sensitivity expressed in years. Effective duration is the duration for a bond with an embedded option when the value is calculated to include the expected change in cash flow caused by the option as interest rates change.

Bloomberg Barclays U.S. Aggregate Index represents securities that are SEC-registered, taxable, and dollar denominated. The index covers the U.S. investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities. These major sectors are subdivided into more specific indices that are calculated and reported on a regular basis. It is not possible to invest directly in an unmanaged index.

Statements concerning financial market trends or portfolio strategies are based on current market conditions, which will fluctuate. There is no guarantee that these investment strategies will work under all market conditions or are suitable for all investors and each investor should evaluate their ability to invest for the long term, especially during periods of downturn in the market. Outlook and strategies are subject to change without notice. Performance reflects changes in share price, reinvestment of dividends and capital gains distributions. All periods longer than one year are annualized. This material contains the current opinions of the manager but not necessarily those of PIMCO and such opinions are subject to change without notice. PIMCO Investments LLC, distributor, 1633 Broadway, New York, NY, 10019 is a company of PIMCO.

Mortgage Backed Securities (MBS);

The credit quality of a particular security or group of securities does not ensure the stability or safety of an overall portfolio. The quality ratings of individual issues/issuers are provided to indicate the credit-worthiness of such issues/issuer and generally range from AAA, Aaa, or AAA (highest) to D, C, or D (lowest) for S&P, Moody's, and Fitch respectively.

"Bend-but-not-break" refers to credits that PIMCO would not expect to default in a credit-stressed environment.

Distributions may be comprised of ordinary income, net capital gains, and/or a return of capital ("ROC") of your investment in the Fund. If the Fund estimates that a portion of its distribution may be comprised of amounts from sources other than net investment income in accordance with its policies and good accounting practices, the Fund will notify shareholders of the estimated composition of such distribution through a Section 19 Notice. The amounts and composition of distributions reported on any Section 19 Notice issued by the Fund are only estimates and should not be used for tax reporting purposes. The actual amounts and composition of distributions for tax reporting purposes will depend upon the Fund's investment experience during its entire fiscal year and may be subject to changes based on tax regulations. Final determination of a distribution's tax character will be reported on Form 1099 DIV sent to shareholders for the calendar year.
